Ideal for protecting conveyors, inventory, in-plant offices, loading docks, electrical equipment, and other vulnerable areas, Panel Built Barrier Rails are constructed of high-strength 11 gauge steel. Panel Built Barrier Railing is offered in both single and double rail varieties. Pockets mounted on Barrier Rail columns allow for easy, slide-in assembly.

Barrier Railing

Barrier rail posts are fabricated using 5" x 5" x 3/16" structural steel columns welded to a 10" x 10" x 1/2" steel base plate. The connection method for horizontal rails shall utilize a slide in place design. Posts will be 42" tall. Columns are anchored to the existing concrete with 4 1/2" long x 1/2" wedge anchors. Rails are fabricated from 11-gauge steel and come in lengths from 2' to 10'. All barrier rail is powder coated safety yellow (other colors available).
