Why **Modular**

- **Portability**
- **Decreased Site Downtime**
- **Tax Depreciation**
- **Minimal Clean-Up**
- **Shorter Project Times**
- **Reusable Materials**
- **Versatility in Design**
- **Safety**
- **Durability**
- **Weather Conditions**

**30-50% Faster than
traditional stick-built**

**15-25% cost savings on
average**

Our Modular Buildings are built for industrial and commercial environments, offering **quick installation** and lasting **durability**. Whether you need a simple prefab unit or a fully **customized** setup with HVAC and electrical integration, we provide solutions that grow with your business.

Offices

Made to Fit Your Space

Panel Built modular offices offer a **fast, flexible, and cost effective** solution for adding enclosed space to any facility. Whether you need a single office or a multi-story structure, our modular systems are **custom designed** to meet your needs and installed with **minimal disruption** to your operations.

Standard Features

Three-Inch Insulated Wall Panels

Standard white and gray colors, with custom options available.

Metal Roof Decking & Drop Ceiling

Includes acoustical ceiling tiles and LED lighting.

Pre-Wired Electrical Package

Includes switches, outlets, breaker panels, and lighting.

Durable Steel Doors & Windows

20-gauge steel doors with picture or sliding glass window options.

Modular Panel System

Allows for easy reconfiguration and expansion.

Additional Options

Wall Material Choices

Enhance sound dampening, insulation, and fire resistance.

Multi-Story & Elevated Offices

Optimize vertical space in modular warehouse offices.

Prefabricated Solutions

Complete service from design and fabrication to installation.

Fire Rated Wall Assemblies

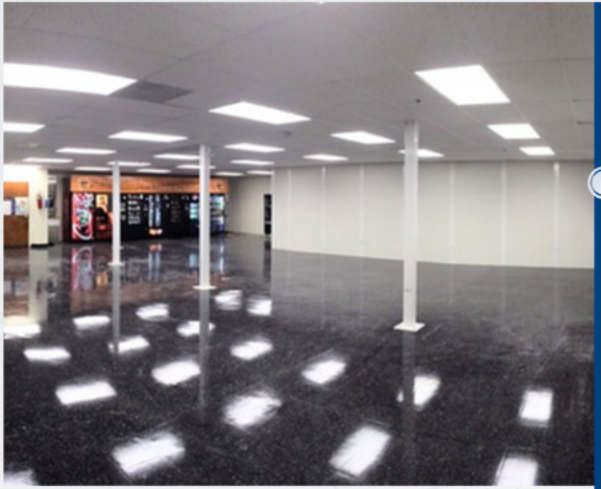

Available in non-combustible and 1-hour fire-rated designs.

Pre-Assembled Delivery

Choose the installation method that best suits your site.

Our Process

We've streamlined our process to make your project as **smooth and efficient as possible**. From the first conversation to final installation, our team guides you through each step to ensure your building meets your **needs, timeline, and budget**.

1 RFQ Received

The first step is always the most important. We work with you to create a description of the desired product so that we can provide a competitive and accurate quote

2 Proposal & Drawing

We will provide a sales drawing, 3D video, and detailed proposal for each new project.

3 Purchase Order

Hopefully every proposal turns into a Purchase Order! Once received, Panel Built will send Approval Structural Drawings to be signed and returned.

4 Approvals Received

Once we receive signed approval drawings complete with color selections, production begins and a ship date is assigned!

More than Just Modular Offices:

Panel Built also designs and manufactures **mezzanines**, **equipment platforms**, **security booths**, **modular enclosures**, **E-Houses**, and much more. Each solution is engineered for **efficiency**, **safety**, and **flexibility**.

Whether you need to expand upward, secure your site, or streamline installation, we deliver **complete space solutions** from top to bottom.
